Export Leaf Tobacco Co.

0957

0957 work mm.

5 or 6 varieties of new
Mc Nair Colors dark varieties.
Variety standards Committee + Co + Univ. soil -
5 year testing uniform + smooth plus want amount
variety of tar and nicotine - or tar and chlorides.
If a variety got to 4% ash content. tar hi wise.
if less than 1%, tar low - would get the
smoke characters. Chlorine - variations is an important
factor. (USDA) - annual report on varieties under review
over the 5 yrs - wise leaves grow down, they'll get in contact with

not an effect. to breed for hi or lo nicotine

we sell to overseas customers.

Soils - an auger sample taken at tenn-Ark making
mic/ smoke/ diff attributes used for cancer
↳ to evaluate variability (Burley) across the season - a characteristic
of smoke elements.
↳ how rate + smoke quality.

sugar varies w/ stalk position lo - lo 5%
hi : hi 25%

each grade has range of mic 1.5 - 2.5 mic
≈ 3% of flavor
≈ 48 Flavor Grade
≈ 2% Burley
